

☐☐ Sample Stockpile Reports

Stockpile Inventory – Sample Reports

Purpose of This Page

This page provides downloadable sample reports for use in the sales process.

These reports are:

- Real examples of deliverables (with sensitive data removed)
- Representative of what clients receive
- Approved for external sharing

Use these samples to:

- Demonstrate professionalism
 - Set expectations
 - Build trust
 - Shorten the sales cycle
-

☐☐ When to Send a Sample Report

Send a sample report when:

- A prospect asks, “What does your report look like?”
- An executive wants to see format before committing
- A new contact is comparing vendors
- You need to reinforce credibility after a discovery call
- You are positioning us as the “easy button”

Do **not** send samples too early in cold outreach.
Send them once there is established interest.

What Our Reports Communicate

When sharing a sample, you are not just sending a PDF.

You are communicating:

- Third-party measurement integrity
- Repeatable methodology
- Executive-ready formatting
- Audit-ready documentation
- Professional data processing standards

Remember:

We are not selling drone flights.

We are selling **inventory confidence**.

Available Sample Reports
